

BANSHEE

LAND AUTONOMOUS MUNITIONS PLATFORM

Banshee platform is a high-performance, highly mobile Unmanned Ground Vehicle (UGV) designed for Anti-Access/Area Denial (A2/AD) missions. Banshee gives the operator the ability to control several platforms remotely from beyond enemy threat range.

With a universal T-slot mounting interface and standardised electrical interface, Banshee has a flexible tactical advantage for mission-specific customization. The payload interface T-slots on the Banshee make the system truly unique allowing modular mounting of payloads from D40 launch cups or anti-tank-mines, further extending its versatility in the field. The platform includes passive target recognition and tracking for greater manoeuvrability.

Banshee shares commonality with other drone platforms through Distributed Digital Architecture (DDA), providing enhanced swarming capability for coordinated operations. Additionally, the T slots on the Banshee allow for the easy mounting of other payloads, such as aerial vehicles like D40s or even tank-mines, further extending its versatility in the field.

SPECIFICATIONS

WIDTH	650 MM
LENGTH (MM)	1000 MM
HEIGHT	300 MM
WEIGHT	<40KG UNLADEN
RATED PAYLOAD CAPACITY	50 KG
GROUND CLEARANCE	150MM

PERFORMANCE

TOP SPEED	100 KM/H
RANGE	30 KM
MAXIMUM GRADIENT	60 %
POWERTRAIN	INDEPENDENT 4WD
SUSPENSION	INDEPENDENT WISHBONE
